Lab Practical #01:

Research and find out what are the current UI/UX design trends. Study of various templates. E.g. Metronic, Unify, AdminLTE, etc.

Practical Assignment #01:

Choose one of the example templates (Metronic/Unify/AdminLTE, etc.) and analyze it.

Fill out a worksheet with these headings:

1. **First Impression:** What is this template's primary goal?
2. **Target User:** Who do you think this was designed for?
3. **Key UI Pattern:** Identify one UI pattern (e.g., the sidebar navigation) and describe how it works.
4. **A/B Opinion:** What is one thing you think it does well, and one thing you would improve?

Description:

1. First Impression: Primary Goal

The template's primary goal is to provide a clean and modern analytics dashboard where users can quickly view key performance statistics such as transactions, news statistics, and phone call trends. The design focuses on quick data visualization, status monitoring, and easy navigation through different modules like CRM, Analytics, Finance, and Projects.

2. Target User

This dashboard is designed for business managers, project managers, CRM or sales teams, administrators, and data analysts.

3. Key UI Pattern: Sidebar Navigation (Primary Pattern)

Pattern: The template prominently uses a left fixed sidebar navigation, a very standard UI pattern in admin dashboards. How it works:

Date: 24/11/2025

- **Always visible:** It stays fixed on the left side, allowing users to switch sections instantly.
- **Icon + Text structure:** Icons help quick identification, while text provides clarity.
- **Expandable menus:** Some sections (Layouts, Widget, Online Courses, Membership, Helpdesk) contain dropdown arrows for nested items.
- **Badge indicators:** Dashboard has a small circular badge showing 7, indicating pending items or notifications.
- **Color contrast:** Dark background sidebar helps differentiate from the light main workspace.

4. A/B Opinion

- **One thing it does well: Clear Visual Hierarchy & Modern UI:** The dashboard uses clean card layouts, bright colors, and well-spaced charts that make key metrics easy to understand at a glance. Important numbers (like ratings and revenue) stand out clearly due to strong typography and color contrast.
- **One thing I would improve: Layout Consistency:** Some cards have dense content while others look too light, which breaks the visual balance. Aligning the spacing and structuring the cards more uniformly would make the dashboard feel more organized and consistent.

Lab Practical #02:

Install Figma on a local machine and understand the Figma software IDE.

Practical Assignment #02:

Install Figma on a local machine and understand the Figma software IDE. Complete the 'Figma Onboarding Scavenger Hunt.' Take screenshots of the important tool sections and add it here. Describe each component.

After installing, open a new file and:

1. **Find:** The 'Frame' tool and create an 'iPhone 14' frame.
2. **Create:** A perfect 50x50px circle and a 200px-wide text box.
3. **Style:** Make the circle red and the text 'Hello World' in 24pt 'Inter' font.
4. **Explore:** Open the 'Community' tab, find one 'Icon Set', and duplicate it into your file.

Description:

1. Install Figma & Understand the IDE

A. Installation

1. **Go to the Website:** Open your browser and go to www.figma.com.
2. **Sign Up/Log In:** Create a free account or log in if you already have one.
3. **Get the App:** While Figma works entirely in the browser, the desktop app is recommended. On the main dashboard after logging in, find the "Downloads" section or look for a download link at the top of your account settings.
4. **Download & Install:** Download the installer for your operating system (Windows or macOS) and run it.

Date: 02/12/2025

B. Understanding the IDE (Your "Tool Screenshots")

Once you open a new design file, the interface is broken into a few key areas. Here is a description of each, just as you would annotate on a screenshot:

1. Top Toolbar (The "Tools"):

- **Main Menu (Figma Icon):** Accesses file options, preferences, and plugins.
- **Move/Scale Tools (V, K):** Your main pointer for selecting and moving (Move) or resizing (Scale) objects.
- **Frame/Slice Tools (F, S):** The **Frame tool (F)** is fundamental. It's the container for all your designs (like an artboard).
- **Shape Tools (R, O, L):** A dropdown menu (defaulting to Rectangle) where you find **Rectangle (R)**, **Ellipse (O)**, Line (L), Arrow, Polygon, and Star.
- **Pen/Pencil Tools (P, Shift+P):** The **Pen tool (P)** is for creating custom vector shapes and paths.
- **Text Tool (T):** Used to create all text.
- **Comment Tool (C):** Allows you to leave feedback comments directly on the design.

2. Left Panel (The "Navigator"):

Date: 02/12/2025

- **Layers:** This tab shows every single object (frame, group, shape, text) on your canvas in a hierarchy. You can reorder, group, and rename items here.
- **Assets:** Once you create "Components" (reusable design elements), they live here.
- **Pages:** You can have multiple pages within one file, which is useful for organizing different sections of a project.

3. Right Panel (The "Inspector" or "Properties"):

- **Design:** This is the most-used tab. When you select an object, this panel shows all its properties: Alignment, Position (X, Y), Size (W, H), **Fill** (color), **Stroke** (border), Effects (shadows), and **Text** properties (font, size, weight).
- **Prototype:** This is where you link frames together to create interactive, clickable prototypes.

Date: 02/12/2025

- **Inspect:** This tab shows developers the code snippets (CSS, Swift, XML) for any selected object, making handoff easier.

4. The Canvas (The "Middle"):

- This is your main, infinite workspace where you place all your frames and objects.

2. Figma Scavenger Hunt: Step-by-Step

After installing and opening a new "Design File," follow these steps on your canvas:

1. Create: A perfect 50x50px circle and a 200px-wide text box.
2. Style: Make the circle red and the text 'Hello World' in 24pt 'Inter' font.
3. Explore: Open the 'Community' tab, find one 'Icon Set', and duplicate it.

Hello World!

Date: 09/12/2025

Lab Practical #03:

Design a simple **Music App** (3 screens) using Basic Tools Position, Size, Rotation, Color Styles, Masks.

Practical Assignment #03:

Design the 'Login Screen'. Focus on tools from Position, Size, Rotation, Color Styles, Masks

Description:

Home Screen

Date: 09/12/2025

Now Playing – Screen

Date: 09/12/2025

List- Screen

Date: 22/12/2025

Lab Practical #04:

Develop mobile or web screen using the tools listed below.

Practical Assignment #04:

Use Basic Tools using Dark Mode with Selection Colors, Gradients, Creating Backgrounds.

Description:

Light – Screen

Date: 22/12/2025

Dark- Screen

Date: 06 / 01 / 2025

Lab Practical #05:

Develop mobile or web screen using the tools listed below.

Practical Assignment #05:

Use the tools listed below:

Blending Modes, Alignment, & Distribution, Union and Corner Radius, Shadow.

Description:

Browse Screen

Date: 06 / 01 / 2025

Artist Screen

Date: 06 / 01 / 2025

Now Playing Screen

Date: 13 / 01 / 2025

Lab Practical #06:

Design the 'Now Playing' screen. Develop mobile or web screen using the tools listed below.

Practical Assignment #06:

Using the tools listed below:

Blur Effects, Using Images, Fill, & Stroke, Text Properties & Styles

Description:

Date: 13 / 01 / 2025

Date: 13 / 01 / 2025

Date: 15 / 01 / 2026

Lab Practical #07:

Develop mobile or web screen of product listing and product detail screen.

Practical Assignment #07:

Develop mobile or web screen of product listing and product detail screen.

Description:

Product List Page

Date: 15 / 01 / 2026

Product Detail Page

Date: 20 / 01 / 2026

Lab Practical #08:

Design the 'User Profile' screen and prototype it. Develop mobile or web screen using the tools listed below.

Practical Assignment #08:

Using the tools listed below:

Layout Grid, Auto Layout in Figma, Prototyping, Plugins in Figma.

Description:

Date: 20 / 01 / 2026

Date: 31 / 01 / 2025

Lab Practical #09:

Design **onboarding screen** for a mobile app.

Practical Assignment #09:

Design a 3-screen **onboarding flow** for a **Financial Literacy App** for students. Your goal is to build trust and explain the app's value. You must include:

1. Clear illustrations (you can use a plugin like 'Blush').
2. A 'Skip' button.
3. A clear call-to-action (CTA) on the final screen.

Description:

Date: 06 / 02 / 2025

Lab Practical #10:

Build a single screen web page using form controls.

Practical Assignment #10:

Design the 'Create Account' screen for the Travel Portal project (using the 'Imaginary' persona). The form must include:

- Fields for: Email, Password, and Confirm Password.
- A 'Sign up with Google' social login button.
- A 'Terms of Service' checkbox.

Ensure all fields and buttons are inside an Auto-Layout frame.

Lab Practical #11:

Prepare the Moodboard for the **Food Delivery App**. Prepare the typography and color style guides in the Figma.

Practical Assignment #11:

Design a Moodboard to define the visual direction, and create typography and color style guides in Figma to establish a consistent look and feel for the **food delivery app**.

Description:

Date: 22/02/2026

Lab Practical #12:

Following the user flow design the Low-Fidelity wireframes for the **Food Delivery app**.

Practical Assignment #12:

Design the Lo-Fi wireframes for one critical **user flow**:

'Ordering a Meal' (from 'Restaurant List' -> 'Menu' -> 'Add to Cart' -> 'Checkout').

Description:

Registration Screen

Date: 22/02/2026

Login Screen

Date: 22/02/2026

Home Screen

Date: 22/02/2026

Product Screen

Date: 22/02/2026

Cart Screen

Date: 22/02/2026

Order Screen

Date: 22/02/2026

Payment Screen

Date: 19/03/2026

Lab Practical #13:

Design an Interactive Prototype for the **High-Fidelity UI** of the **Food Delivery App** portal.

Practical Assignment #13:

Convert your 'Ordering a Meal' Lo-Fi wireframes (from **Lab 12**) into a **High-Fidelity UI**, using your style guide (from **Lab 11**). Then, link the screens to create an interactive prototype of that single flow.

Description:

The image shows a mobile app interface for Swiggy. At the top is an orange header bar with a white back arrow and the 'SWIGGY' logo. Below the header is a large, light gray circular button with a person icon and a small orange plus sign. Underneath this is the text 'Create Your Account'. There are five white input fields with rounded corners, each with a gray placeholder text: 'Full Name', 'Email Address', 'Phone Number', 'Password', and 'Confirm Password'. Below the input fields is a link that says 'I agree to Swiggy's Terms & Conditions'. At the bottom is a large orange button with the text 'Create Account' in white.
